Developed as a food service and light industrial range, Ezy-Pail features a patented 'lift tab' that couples easy, fingertip opening with providing evidence of unauthorised opening or tampering. This is easily seen when one or both 'lift tabs' no longer fit flush. A living hinge allows 'lift tabs' to open lids time and time again without breaking off to potentially contaminate a food service area. The lid itself is liquid tight, resealable and available in a range of colours.

Quality polymers and a smooth, clean design contribute to the smart retail presence of the Ezy-Pail for such high value delicacies as a 250 ml pail of oysters all the way up to enhancing the value of milk powder and other bulk items packaged in the 10 litre Ezy-Pail.

Features include manufacture under clean room conditions, plastic only handles (to better enable detection of any metal contaminants of contents), membrane seal capability, up to four colours off!

Consult your Viscount Plastics representative where weights, volumes and dimensions are critical, as those shown should be treated as indicated only. Viscount Plastics reserves the right to at its discretion alter products shown.

Auckland

8 Vestey Drive, Mt Wellington.
P.O. Box 22-462, Otahuhu, Auckland, New Zealand.
