

VISCOUNT EZY PAIL RANGE

Developed as a food service and light industrial range, the EZY-Pail features the patented LIFTAB™ that couples as an easy, fingertip opening while providing evidence of unauthorised opening or tampering.

This is easily seen when the LIFTAB™ no longer fits flush. A living hinge allows LIFTAB™ to open lids time and time again without breaking. The lid itself is resealable and available in a range of colours.

IML Base

Quality food grade polymers and a smooth, clean design contribute to the smart retail presence of the Ezy-Pail for such high value delicacies as a 250ml pail of gelato all the way up to enhancing the value of milk powder and other bulk items packaged in the 10 litre Ezy-Pail. Features include, plastic only handles (to better enable detection of any metal contaminants of contents), and up to four colours offset.

Viscount Inmould Labelling

Viscount Plastics' Inmould Labelling (IML) breaks free from the constraints of conventional decoration methods by introducing preprinted polymer labels into the moulding process to create a seamless fusion of label and rigid plastic packaging. The benefits are as practical as they are aesthetic.

Please consult Viscount Plastics where weights, volumes and dimensions are critical, as those shown should be treated as indicative only. (Viscount Plastics reserves the right to make product alterations at its discretion).
