

VISCOUNT PRY-OFF RANGE

Pails don't come tougher or more industrial strength than the Viscount Pry-Off range. These are the pails of choice for manufacturers of corrosive and potentially dangerous goods such as chemicals, cleaning agents and heavy duty adhesives. Pry-Off pails can be custom-moulded by Viscount Plastics in materials that meet specific categories of the United Nations dangerous goods packaging criteria.

Injection moulded from polymers that provide extreme flexibility, the 'push on - peel back' lid has excellent air tight resealing characteristics, is liquid tight, drop safe and can withstand a high degree of sideways distortion without breaking its seal with the pail rim.
