

VISCOUNT SPACESAVER RANGE

The Square shape of the Viscount Spacesaver is recognised as the most economic and cost effective for national and international distribution and recycle collection. The 'square shape' dimensions of the pails add up to optimised packaging density on pallets, in storage, in shipping containers and on display shelving, where each wall presents a large surface for labelling and brand identity.

New Zealand's largest square shape pail range, the Spacesaver pails are manufactured under clean room conditions to further increase their suitability for containing everything from export food products, including frozen goods to items as industrial as nails.

Features include push on lids, the option of metal or plastic handles (on large size pails), and screen printing or hot foil stamping.
